

Списък на публикациите, в които проф. дфн Изак Маир Бивас е
автор или съавтор

Общ брой публикации: 63 + два автореферата

1. One-Dimensional Approach to Spontaneous Deformations in Nematic Liquid Crystals
A. Derzhanski, I. Bivas and A. G. Petrov, Comptes rendus de l'Académie bulgare des sciences, 28, 1327 (1975).
2. Influence of the Lengths and Conformation States of Hydrocarbon Chains on the Stability of Lyotropic Phases
A. Derzhanski and I. Bivas, Phys. Lett., 74A, 372 (1979).
3. Molecular Asymmetry, Flexoelectricity and Elasticity of Nematics
A. Derzhanski, A. G. Petrov and I. Bivas, in "Advances in Liquid Crystal Research and Application", edited by Lajos Bata, Pergamon Press, Oxford - Academiai Kiado - Budapest (1980), p.505.
4. On the Quadrupole Mechanism of Flexoelectricity
I. Bivas and A. Derzhanski, in "Advances in Liquid Crystal Research and Application", edited by Lajos Bata, Pergamon Press, Oxford - Academiai Kiado - Budapest (1980), p.505.
5. Statistical Mechanical Theory for Hydrophobic Core of Lipid Bilayer
I. Bivas and A. Derzhanski, Mol. Cryst. Liquid Crystals, 74, 1771 (1981).
6. Flexoelectric and Steric Interactions between Two Bilayer Lipid Membranes Resulting from their Curvature Fluctuations
I. Bivas and A. G. Petrov, J. theor. Biol., 88, 459 (1980).
7. Stress applied on Lipid Bilayer leads to Pore Formation
I. Bivas and M. D. Mitov, Comptes rendus de l'Académie bulgare des Sciences, 36, 775 (1983).
8. The Dependence of the Curvature Elasticity Moduli of a Lipid Bilayer on the Change of the Surface Tension at a Curving Oil-Water Interface
I. Bivas, Phys. Lett., 94A, 114 (1983).
9. Estimation of thermodynamic parameters at phase transformations of cerebrone
C. A. Seleznev, I. M. Bivas, I. G. Tchistyakov, Biofizika (USSR), 39 (4), 601 (1984) (in Russian).
10. Elastic and Flexoelectric Aspects of Out-of-Plane Fluctuations in Biological and Model Membranes
A. G. Petrov and I. Bivas, Progr. Surf. Sci., 16(4), 389 (1984).
11. Pores and Their Number in Bilayer Lipid Membranes
I. Bivas, J. Physique Lett., 46, L-513 (1985).
12. Influence of Dissolved Additives on the Critical Micellar Concentration of Surfactants
A. Derzhanski, S. Panayotova, G. Popov, and I. Bivas, in "Surfactants in Solution", vol. 4, edited by K. L. Mittal and P. Bothorel, Plenum Press, NY and London, 1986, p.333.

13. An Application of the Optical Microscopy to the Determination of the Curvature Elastic Modulus of Biological and Model Membranes
I. Bivas, P. Hanusse, P. Bothorel, J. Lalanne, O. Aguerre-Chariol,
J. Physique 48, 855 (1987).
14. Dependence of the Critical Micellar Concentration of Surfactants on Dissolved Additives with Finite Concentrations
A. Derzhanski, S. Panayotova, and I. Bivas, Mol. Cryst. Liquid Crystals, 152, 301 (1987).
15. Curvature Elasticity Moduli of Bilayer Lipid Membranes
I. Bivas, Mol. Cryst. Liquid Crystals, 152, 311 (1987).
16. Bending Elasticity and Thermal Fluctuations of Lipid Membranes. Theoretical and Experimental Requirements.
J.-F. Faucon, M. D. Mitov, P. Meleard, I. Bivas, P. Bothorel,
J. Physique, 50, 2389 (1989).
17. Thermal Fluctuations of Giant Vesicles and Elastic Properties of Bilayer Lipid Membranes. The Role of the Excess Surface
J.-F. Faucon, P. Meleard, M. D. Mitov, I. Bivas, P. Bothorel,
Progr. Colloid Polym. Sci, 79, 11 (1989).
18. Computer-Aided Investigations of the Hydrophobic Core of the Lipid Monolayer
I. Bivas, B. Lemaire, P. Bothorel, in: "Molecular Description of Biological Membranes by Computer - Aided Conformational Analysis", R. Brasseur Ed., CRC Press, Boca Raton, USA, vol. 1 (1990) p. 85.
19. Latest Theoretical and Experimental Investigations of the Flexoeffect in Membranes
A. Derzhanski, I. Bivas and A. G. Petrov, Mol. Cryst. and Liquid Crystals, 199, 97 (1990).
20. Effect of Flexoelectricity on the Curvature Elasticity of Membranes
I. Bivas and A. Kozlov, Liquid Crystals, 8, 813 (1990).
21. Critical Micellar Concentration of Surfactant Solutions when Additives with Different Solubilities are present in the Solution
S. Panayotova, A. Derzhanski and I. Bivas, Bulg. J. Phys., 17, 444 (1990).
22. Change in the Structure and Permeability of Phosphatidyl-choline Membranes Stimulated by Prostaglandins.
A. D. Sorokina, N. D. Janopolskaya, G. A. Deborin, T. L. Yailenko, L. I. Boguslavsky, and I. Bivas, Bioelectrochemistry & Bioenergetics, 23, 271 (1990).
23. Influence of the Electric Double Layers of the Membrane on the Value of its Flexoelectric Coefficient
K. Hristova, I. Bivas, A. G. Petrov and A. Derzhanski, Mol. Cryst. Liquid Crystals, 200, 71 (1991).
24. The Electric Part of the Curvature Elasticity of a Membrane and its Relation to Flexoelectricity
I. Bivas and K. Hristova, Liquid Crystals, 9, 883 (1991).
25. Molecular Theory of the Lifetime of Black Lipid Membranes
I. Bivas, J. Colloid and Interface Sci., 144, 63 (1991).

26. Investigation of the dependence of the glucose permeability of phosphatidylcholine liposomes on the contained in them prostaglandine A. D. Sorokina, H. D. Yanopolskaya, I. M. Bivas, T. L. Yaylenko, L. I. Boguslavski, *Biohimia (USSR)*, 56, 747 (1991) (in Russian).
27. Frequency Dependence of the Membrane Flexoelectric Voltage Responce. Adsorption of Multivalent Counterions on the Surface of Curved Lipid Bilayer. K. Hristova, I. Bivas and A. Derzhanski, *Mol. Cryst. and Liquid Crystals*, 215, 237 (1992).
28. Correlations between the form fluctuation modes of flaccid quasispherical lipid vesicles and their role in the calculation of the curvature elastic modulus of the vesicle membrane. Numerical results I. Bivas, L. Bivolarski, M. D. Mitov and A. Derzhanski, *J. Phys. II France*, 2, 1423 (1992).
29. Temperature and Chain Length Effects on Bending Elasticity of Phosphatidylcholine Bilayers L. Fernandez-Puente, I. Bivas, M. D. Mitov and P. Meleard, *Europhys. Lett.*, 28, 181 (1994).
30. Estimation of thin-film platinum thermometer precision in the range 13.8-273.16 K and common mathematical description above 70 K, D. A. Dimitrov, J.K. Georgiev, A. L. Zahariev, and I. Bivas, *Cryogenics*, 36, 599 (1996).
31. Bending elasticities of modified membranes: Influences of temperature and sterol content P. Meleard, C. Gerbeaud, T. Pott, L. Fernandez-Puente, I. Bivas, M. D. Mitov, and J. Dufourcq, *Biophys. J.*, 72, 2616 (1997).
32. Elastic properties of lipid bilayers containing modified lipids, I. Bivas, D. Georgescauld, N. Jeandaine, M. Winterhalter, P. Meleard, G. Marinov, and P. Bothorel, *Prog. Colloid Polym. Sci.*, 105, 197 (1997).
33. Elasticity of bilayers containing PEG lipids I. Bivas, M. Winterhalter, P. Meleard, P. Bothorel, *Europhys. Lett.*, 41, 261 (1998).
34. Thermal shape fluctuations of a quasi spherical lipid vesicle when the mutual displacements of its monolayers are taken into account I. Bivas, P. Meleard, I. Mitcheva, P. Bothorel, *Colloids and Surfaces A: Physicochem. and Engineering Aspects*, 157, 33 (1999).
35. Free energy of a fluctuating vesicle. Influence of the fluctuations on the Laplace law I. Bivas, in "Giant Vesicles", P. Walde and P. L. Luisi eds., John Wiley & Sons, p.95 (2000).
36. Mechanical properties of lipid bilayers, containing modified lipids I. Bivas, V. Vitkova, M. D. Mitov, M. Winterhalter, R. G. Alargova, P. Meleard, and P. Bothorel, in "Giant Vesicles", P. Walde and P. L. Luisi eds., John Wiley & Sons, p.207 (2000).
37. Pores - Possible Mechanism of Communication between the Two Sides of a Lipid Bilayer under Tension V. Vitkova, J. Genova, and I. Bivas, in: "Materials for Information

Technology in the New Millenium", edited by A. G. Petrov and J. Marshal, World Scientific, Singapore, p. 448 (2001).

38. Elasticity and Shape Equation of a Liquid Membrane
I. Bivas, *The Europ. Phys. J. B*, 29, 317 (2002).
39. Experimental and Theoretical Study of Lipid Bilayers Permeability and Hidden Area
V. Vitkova, J. Genova and I. Bivas, *Compt. rendus Acad. bulg. Sci.*, 55 (10), 15 (2002).
40. Bending Elasticity and Bending Fluctuations of Lipid Bilayer Containing an Additive
I. Bivas and P. Meleard, *Phys. Rev. E*, 67, 012901 (2003).
41. Rubbing-induced surface textures in nematic MBBA layers and their behaviour under applied d.c. or a.c. voltages
H. P. Hinov, I. Bivas, M. D. Mitov, and K. Shoumarov, *Liquid Crystals*, 30 (8), 945 (2003).
42. A further experimental study of parallel surface-induced flexoelectric domains (PSIFED) (flexo-dielectric walls)
H. P. Hinov, I. Bivas, M. D. Mitov, K. Shoumarov, and Y. Marinov, *Liquid Crystals*, 30 (11), 1293 (2003).
43. Boundaries of the Liquid Crystalline Phase in the Binary System Triton-X-114 - Water
S. Panayotova and I. Bivas, *Bulg. J. Phys.*, 31, 83 (2004).
44. Fields and forces acting on a planar membrane with a conducting channel,
I. Bivas and C. Danelon, *Phys. Rev. E*, 69, 041901 (2004).
45. Mechanical properties of lipid mono- and bilayers in the presence of small carbohydrates in the aqueous phase,
V. Vitkova, J. Genova, M. D. Mitov, and I. Bivas, *Compt. rendus Acad. bulg. Sci.*, 57, 55 (2004).
46. Surface charge effect on the bending elasticity of lipid bilayers
V. Vitkova, J. Genova, O. Finogenova, M. D. Mitov, Yu. Ermakov, and I. Bivas, *Compt. rendus Acad. bulg. Sci.*, 57 (11), 25 (2004).
47. Permeability and Hidden Area of Lipid Bilayer
V. Vitkova, J. Genova, and I. Bivas, *Europ. Biophys. J.*, 33, 706 (2004).
48. Alamethicin influence on the membrane bending elaticity
V. Vitkova, P. Meleard, T. Pott, and I. Bivas, *Europ. Biophys. J.*, 35, 281 (2006).
49. Sugars in the aqueous phase change the mechanical properties of lipid mono- and bilayers
V. Vitkova, J. Genova, M. D. Mitov, and I. Bivas, *Mol. Cryst. Liquid Cryst.*, 449, 95 (2006).
50. Electrostatic and mechanical properties of a flat lipid bilayer containing ionic lipids,
I. Bivas, *Colloids and Surfaces A: Physicochem. and Engineering Aspects*, 282-283, 423 (2006).

51. Elasticity and Electrostatics of Amphiphilic Layers, I. Bivas and Yu. A. Ermakov, in "Advances in Planar Lipid Bilayers and Liposomes", edited by A. Leitmannova Liu, Elsevier, Amsterdam, 2007, Volume 5, Chapter 11, pp. 313-343.
52. Membrane bending elasticity of human erythrocyte ghosts, V. Vitkova, V. Doltchinkova, M. D. Mitov, and I. Bivas, Journal of Optoelectronics and Advanced Materials, 9, 431 (2007).
53. Large scale vibrational Hamiltonian calculations on thiophosgene, Svetoslav Rashev, Isak Bivas, David C. Moule, Chemical Physics Letters, 438, 153-156 (2007).
54. Stretching elasticity of lipid bilayer, containing an inclusion, which is soluble in the liquid phase around the membrane, I. Bivas, in "NANOSCALE PHENOMENA AND STRUCTURES", edited by D. Kashchiev, Prof. Marin Drinov Academic Publishing House, Sofia, Bulgaria (2008), p.171.
55. Modeling of low-temperature specific heat data for Ge₂₇As₁₃S₆₀ and As₄₀S₆₀ glasses by means of the phenomenologically modified soft potential model, Bonka Terziyska, Isak Bivas, and Konstantin Nenkov, Cryogenics, 49, 171 (2009).
56. Shape fluctuations of nearly spherical lipid vesicles and emulsion droplets, Isak Bivas, Phys. Rev. E, 81, 061911 (2010).
57. Experimental study of the electrically induced optical birefringence in suspension of densely packed giant lipid vesicles, K. Antonova, V. Vitkova, G. Popkirov, T. Tenev, I. Miloushev, and I. Bivas, Journal of Physics: Conference Series, 253, 012058 (2010).
58. Electrical resistivity of the liquid phase of vesicular suspensions prepared by different methods, V. Vitkova, K. Antonova, G. Popkirov, M. D. Mitov, Yu. A. Ermakov, and I. Bivas, Journal of Physics: Conference Series, 253, 012059 (2010)
59. Bending rigidity of lipid membranes and the pH of aqueous surroundings, V Vitkova, D. Mitkova, A. Stoyanova-Ivanova, N Kozarev, I. Bivas, COMPTES RENDUS DE L ACADEMIE BULGARE DES SCIENCES, Volume 65, Issue 3, Pages: 329-334 (2012).
60. Registration and analysis of the shape fluctuations of nearly spherical lipid vesicles, Julia Genova, Victoria Vitkova, and Isak Bivas, Phys. Rev. E, 88, 022707 (2013).
61. Thermal Fluctuations of Phospholipid Vesicles Studied by Monte Carlo Simulations, Miha Fosnaric, Samo Penic, Ales Iglic, and Isak Bivas, in "Advances in Planar Lipid Bilayers and Liposomes", edited by Ales Iglic and Julia Genova, Elsevier, Amsterdam, 2013, Volume 17, Chapter 12, pp. 331-357.
62. Cholesterol Influence on the Elastic Properties of Lipid Membranes, J. Genova, I. Bivas, and R. Marinov, Colloids and Surfaces A: Physicochem. and Engineering Aspects, 460, 79 (2014).
63. On the statistical mechanics of shape fluctuations of nearly spherical

lipid vesicle

I. Bivas and N. S. Tonchev, Journal of Physics: Conference Series (in press).
